

JEMINA AGUILAR

STEEL FRAME DETAILER - VERTEX BD

Metro Manila, Philippines | jdianeaguilar@gmail.com | 0929-263-5766

BIM/LGSF steel detailer with 3+ years experience building accurate 3D structural steel models using **Vertex BD** and **SketchUp**, producing fabrication-ready shop drawings, panel layouts, and cutting lists with a strong focus on connection accuracy and quality checking. Comfortable working from concept to design and fabrication-ready documentation, and quick to pick up new detailing software if needed.

AREA OF EXPERTISE

Technical & Digital

- Vertex BD - BIM Steel Framing Modeling
- Shop Drawings and Panel Layouts
- CNC/Cutting lists Generation
- SketchUp 3D Modeling
- AutoCAD 2D Drawing

Organization & Documentation

- Model cleanup, QA checks, and optimization
- Team coordination and deadline management
- Connection Accuracy and QA/QC checks
- Deadline Management

PROFESSIONAL EXPERIENCE

AutoCAD Operator - Grand Apex Construction Inc.

April 2026 - Present

- Prepared accurate as-built drawings and plans for building permits, compliance documentation, and occupancy requirements.
- Created 3D models and renderings for client presentations, perspectives, and space visualisation.
- Designed functional and practical residential and commercial spaces using AutoCAD and SketchUp to produce accurate 2D drawings and 3D models, ensuring design requirements, constructability, and efficient building layouts.

Designer/BIM Specialist - Madhouse Engineering Consultancy

Mar 2024 - Nov 2025

- Developed architectural layouts in SketchUp and converted them into detailed 3D Light Gauge Steel Framing (LGSF) models using Vertex BD.
- Designed complete LGSF systems, including floors, walls, stairs, trusses, and roof structures, ensuring accurate member profiles, connections, and fastening details.
- Prepared fabrication-ready shop drawings, panel layouts, CNC cutting lists, and 2D framing plans for manufacturing and site installation.

Design Associate - Accutech Steel Service Center

Feb 2023 - Feb 2024

- Created BIM models of complete building structures, including floor and wall frames, stairs, trusses, and roof systems based on project specifications.
- Prepared detailed LGSF panel layouts, shop drawings, and fabrication documentation, ensuring accurate connections, profiles, and fit-up before manufacturing.
- Performed quality checks and maintained organised project files while managing multiple projects and meeting detailing requirements.

Interior Design Associate - Jas Ancheta Interiors

Nov 2022 - Feb 2023

- Built and optimized clean, detailed SketchUp 3D models for interior and architectural concepts, incorporating client and design feedback.
- Produced high-quality renderings using Enscape while maintaining well-structured, organized project files.
- Created 2D plans, and organized library assets to support design development and team handoffs.

EDUCATION

Bachelor of Graphics Technology

2018 - 2022

Technological University of the Philippines

- Major in Architecture Technology
